

REMARKS

The specification is corrected in accordance with the Examiner's instruction and it is believed that the objection should be removed. References 11', 12', 15', 16', 17', 18', and 20' are respectively added to designate the parts on the second end of the handle and the second socket. The word "angel" is corrected to be -- angle -- throughout the specification and claims. Figs. 1, 3, 5, 6 and 7 are respectively amended and the replacement sheets are attached with the remarks. The size of the polygonal engaging hole in the socket (30) has been amended so as to be engaged with the rod (50). References 11', 12', 15', 16', 17', 18', and 20' are respectively added to designate the parts on the second end of the handle and the second socket (40).

Claims 1-10 are respectively amended to delete all the numeral references used in these claims and the antecedent basis for "the socket", "the two passages", "the recess area", "the springs" and "the positioning device" are clearly defined.

Applicant thanks the Examiner who has pointed out that claims 1-10 would be given favorable consideration if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 second paragraph, set forth in this Office Action. Therefore, it is believed that, the rejections under 35 U.S.C. 112 should be removed, and the amended claims 1 and 4 should be allowable. It is further submitted the amended claims 2 and 3 should be allowable as they are dependent upon the amended claim 1 which is believed to be allowable. Claims 5-10 should be allowable as they are

dependent upon the amended claim 4 which is believed to be allowable.

In view of the foregoing amendments and remarks, Applicant submits that the application is now in a condition for allowance and such action is respectfully requested.

Respectfully submitted,

CHIH-CHING HSIEN
